

# S.T.A.B.L.E. PROGRAM

7th ed.

IN-PERSON  
CLASS  
OFFERING!

S.T.A.B.L.E. is the most widely distributed and implemented neonatal education program to focus exclusively on the post-resuscitation/pre-transport stabilization care of sick infants. Based on a mnemonic to optimize learning, retention and recall of information, S.T.A.B.L.E. stands for the six assessment and care modules in the program: sugar, temperature, airway, blood pressure, lab work, and emotional support. A seventh module, quality improvement, stresses the professional responsibility of improving and evaluating care provided to sick infants.
